

MODELSCART

Mini AED Trainer

D-0009

Description

- AED trainer (Automatic External Defibrillator Trainer) D-0009 is designed to prepare the emergency responder to use the clinical Automatic External Defibrillator (AED) in the emergency.
- AED Trainer provides simulated shock delivery. It has no high-voltage capabilities, and cannot deliver a shock, thereby ensuring safety during training.
- It is completely compliant with AHA new guidelines, and pre-configured with 10 training scenarios that simulate realistic sudden cardiac arrest episodes.
