Practiman Electronic

MB-001P

Description

- Compression feedback Monitor with electronic feedback in real time of rate, depth and decompression.
- Wireless system
- Two in one simulator - Adult/Child: A push button allows to choose between adult mode or child mode
- Anatomically perfect
- Real-Life Head/Nose Breathing System with jaw thrust maneuver: If the head is not tilted & the nostrils are not pinched the breath resuscitation system will not function and the chest will not rise
- Blind Mode: Allows the user to practice without feedback and see the result at the end of the cycle.
- Realistic opening of airway
- Practice Mode: The user can mute the feedback system by simply turning the dial knob to 'N' position.
- Ultra Hygienic: Unique one-way valve make system doesn't allow air to return from lungs to user, thus avoiding Contagions.
- Exclusive three position selector dial
- AED Compatible: This model is perfectly compatible to use with an AED trainer machine. The skin leaves no residue on AED pads. (AED trainer NOT included along)
