

MODELSCART

Gunshot Wound Stop Bleeding and Packing Training Kit

RX-04025

Description

- The gunshot wound model simulates the realistic appearance and characteristics of a gunshot wound, creating lifelike training scenarios.
- Made of high-grade silicone and can be reused.
- Trainees and students are able to accurately see whether they are successfully halting the bleeding, as the blood will be unable to continue bleeding, should the correct pressure be applied.
- Students aim is to stop the bleeding and pack the wound well.
