

MODELSCART

Transparent Dental Model with pathologies, cavities and treatments

RX-403T

Description

- Transparent Pathological Teeth Model shows Dental Bridges, Maryland Bridge, Dental Implants, Dental Cavities, Decay in pulp, Dental cysts, Root canal, and impacted teeth.
- It will provide patients with a better and visual understanding of what their dentists are verbally describing to them.
- Life-size. Made of durable acrylic. The high-transparency tooth models can visually show tooth structure and function.
- Dental model consists of detachable components for easy removal and installation. The transparent design provides full visibility of tooth implants and root structures.
- The dental teaching model can be opened 290° to enable full view of all teeth in both the upper and lower jaw individually or completely.
- Ideal for patient education or dental student training.
- It serves as a superb professional decoration in dental offices and clinics.
- Parents can use the teeth model to teach their children what a sick tooth looks like and how to take good care of their teeth.
