

MODELSCART

Neonatal Lumbar Puncture Model

RX-L68B

Description

- Clearly visible scalp veins are ideal for IV practice on a baby's scalp
- The model has main veins of the scalp, including venae temporales superficiales vein and venae frontales, and can be used to infusion, injection and phlebotomy.
- There is obvious feeling when needle penetrates into the veins. Blood flash back indicates proper insertion
- These operations won't cause leaks
