

MODELSCART

Advanced Suture Practice Arm

RX-LV1

Description

- Enhance surgical training with this realistic Suture Practice Arm Model.
- The model which represents a human arm, contains 'wounds' to suture. New wounds can also be cut on this model.
- The skin is realistic, durable and pliable.
- This allows students to practice their suturing technique in a safe, non-pressured learning environment.
- Can also learn how to remove non-absorbable sutures, another fundamental clinical skill.
- Additionally, trainers can use the model to guide sessions about important topics such as indications for sutures and the different types available.
