

# MODELSCART

## Advanced Suture Practice

### Leg

RX-LV2

#### Description

- Ideal realistic model for medical and nursing students.
- It is an excellent piece of training equipment which offers the valuable chance to repeatedly practice an important clinical skill.
- Students can learn all about suturing, from the basic steps to the different styles and techniques. They will gain confidence and competency, therefore ultimately enhancing the quality of care they provide to patients.
- The suture training model contains several 'wounds' present, and new 'wounds' can also be cut throughout the leg and foot.
- The skin of the model is soft, pliable and realistic.
- Medical trainers can also use the model to guide important sessions about types of sutures, indication for sutures and signs of good wound healing.
