

MODELSCART

Whole Body CPR Model with Monitor & Printer

XC-406-2

Description

- This simulation of Adult Model is designed according to the International CPR standard.
 - In this model there is Monitor for skill guide which prompts for correct and incorrect artificial respiration as well as correct or incorrect compression.
 - Realistic anatomical characteristics, including realistic touch feeling and life-like skin color, vivid appearance
 - Simulates vital signs (a)Pupil state: contrast observation of pupils, one is dilated, the other one is contracted (b) Carotid artery response: simulate carotid artery pulse
 - Open airway
 - Can perform artificial breathing and external cardiac compression
- ▶ CPR instrument feature:
- Available CPR training
 - Electronic monitoring of compression site
 - Indicators show inflation volume, correct inflation volume: 800-1200ml (a)Insufficient inflation volume, yellow indicator (b)Proper inflation volume, green indicator (c)Excessive inflation volume, red indicator
 - Indicators show compression depth: correct compression depth: 4-5cm (a)Insufficient compression depth, yellow indicator (b)Proper compression depth, green indicator (c)Excessive compression depth, red indicator
 - Skill guide voice Prompt
 - Operation rate: ≥ 100 times/min
 - Operation cycle: 2 valid inflation after 30 valid compression, 5 cycles
 - Can set the operating time, value in seconds
 - Print the results
